

Retinal phenotypes

● ● ●
Neuroretina Outer retina Microvasculature

Genetic relationships

Eight systemic diseases

● ● ● ●
Cardio- Renal Neuro- Immune /
metabolic degeneration inflammation

A Genome-wide sharing

14 retinal traits x 8 diseases
112 LDSC pairs

B Regional sharing

Locked 47-pair subset
HDL-L plus LAVA sensitivity

C Directional evidence

7 qualified OCT traits x 8 diseases x 2
112 MR directions

Vascular traits retained in
global and local analyses;
not evaluated by MR

MR restricted prospectively to data-integrity-qualified OCT traits
